### ... Polio

(Continued from Page 1)  
Type III polio were noted following the inoculation of 4,000,000 persons.

DR. PAUL WEHRLE, chief of the communicable diseases section of Los Angeles County General Hospital and a member of LACMA's polio advisory committee, described the four cases reported after the inoculation of 4,000,000 in Canada as a "fantastically low rate," because of the incident of polio which would be present before the immunization was given.

He declared all necessary data on the Canadian cases have not been processed as yet to determine actual cause of the disease or its relationship to the vaccine given.

"IT MOST certainly is advisable to be cautious, however, until all the facts have been documented relative to Type III vaccine," Dr. Wehrle stated.

"When the time for administering Type III arrives, the committee feels the issue of its safety will have been fully determined both in the United States and Canada," Dr. Smart declared.

### Lesson Topic On 'Matter'

What changing one's standpoint can mean in meeting today's challenges will be brought out at Christian Science church services Sunday.

"Love not the world, neither the things that are in the world" is the Golden Text from the Bible. It keynotes a lesson-sermon on the subject of "Matter."

One of the selections to be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy states: "When understanding changes the standpoints of life and intelligence from a material to a spiritual basis, we shall gain the reality of Life, the control of Soul over sense, and we shall perceive Christianity, or Truth, in its divine Principle."
